

## HOW CAN WE PARTNER TO **PUT MORE MONEY TO YOUR BOTTOM LINE?**

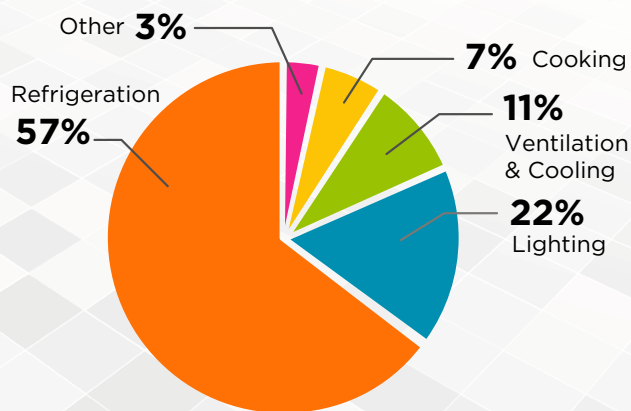

A typical grocery store spends approximately \$4 per square foot on energy costs each year. By lowering these costs, you can significantly increase your profitability. Let XtraLight help you to reduce both energy and maintenance costs.

Utility Companies are offering millions of dollars in rebates for energy efficient projects. Let XtraLight help you determine the best place to start in your portfolio that will not only reduce the high monthly cost of energy bills, but collect the highest amount of rebate dollars.

A significant portion of your facilities' financial success depends on reducing your controllable costs. XtraLight's energy specialists can help you use energy more efficiently, maximize the return on your investments, improve net operating income, increase building and facility asset value and balance out your carbon footprint.

### Major Electricity Use In Grocery Stores

## LET US OFFER YOU A **FREE ENERGY AUDIT**

- Identify opportunities for energy-efficient upgrades - interior/exterior.
- Find areas that can be integrated with occupancy sensors.
- Energy audits usually find up to 75% energy savings while increasing light levels across the board.
- Save maintenance costs and products are backed by 10-Year Warranty.
- We can help collect utility rebates and find potential tax deductions.
- New enhanced LED lighting allows for more customer comfort and safety, giving your customers a better shopping experience.
