INSTALLATION

Trunnion Mount

1. Make sure power to fixture is off.
2. Use drilling template below to drill mounting holes in mounting surface.
3. Using appropriate hardware (not provided), attached fixture to mounting surface.
4. Wire fixture cord to supply wires in junction box (not provided).
5. Remove (4) Philips head screws and nuts in trunnion.
6. Loosen Hex bolts on each side of the fixture.
7. Tilt fixture to desired position.
8. Replace (4) Philips head screws to lock in position.
9. Re-tighten Hex bolts.
10. Turn power on.
Slip Fitter Mount

1. Make sure that all power to fixture is off.
2. Connect fixture wires to supply wires.
3. Place slip fitter, with fixture attached, over pole tenon, being careful not to pinch wires. Tighten (4) set screws to secure slip fitter to pole.
4. Remove (2) philips screws on side cover plate, remove plate and set aside.
5. To aim, loosen nut inside slip fitter knuckle, aim fixture (in 10° increments), and retighten nut. Replace cover plate.
6. Turn power on.
WIRING

Universal driver: 120VAC - 277VAC, 50/60HZ.

1. Verify that the electrical power to the Luminaire is in the OFF position.
2. Connect the fixture side Black lead to Line supply lead.
3. Connect the fixture side White lead to Neutral supply lead.
4. Connect the fixture side Green lead to Green supply lead.
5. Energize the electrical power and verify proper operation.
